

# CPD

" I would recommend Eddie to any educators seeking to develop their teaching methodology with the confidence that they will receive instruction from a highly professional individual with a depth and breadth of technical and educational expertise."

**Stephen Stott,**  
Education Program Manager  
Autodesk Inc.,  
Europe, Middle East & Africa

" You delivered the best inset experience I have ever received in twenty five years of teaching. Your video tutorials are superb, thanks. We will definitely be subscribing to your website."

**Steve Mylchreest,**  
Head of Design & Tech.  
Perth Academy

## COURSE CONTENTS

Softwares Available

Appropriate Preparation

Setting up the Recorder

First Raw Recordings

Setting up a Project

Editing Considerations

Sound – Narrations and Music

Final Enhancements

The Burn Process

Sharing the Results

## CREATING VIDEO TUTORIALS

Pedagogically sound, interactive, a lot easier than you think

Date : By arrangement

Time : Six hours

Venue : Your premises

Numbers : Maximum 20

Cost : £625 + travel

This full day course is aimed at any teacher who has tried to teach someone how to use any kind of software package and found the step-by-step, printed notes approach to be less than stimulating.

The cost includes teaching material used in the delivery of the course on the day which can be used for future learning and teaching in the centre. All courses are recorded live and provided in the form of video tutorial material to participants.

Bearing in mind that it is perfectly possible to negotiate content, shown in the panel on the left is the structure of a typical, one day, introductory course in Creating Video Tutorials.

Our course Tutors have decades of experience in delivering high quality inservice in a wide range of ICT disciplines both within and outwith Design & Technology.

Participants can be assured of feeling they made the best use of their valuable CPD time during the course and in the vital weeks after when they are able to play back the day's sessions while consolidating their learning.
